SUMMARY

Highly motivated cybersecurity analyst with 2 years of freelancing experience and comprehensive skills in cyber defense activities. Excels in creating analytics to detect cyber threats. Pentested more than 5 websites, showcasing leadership abilities and technical expertise. Always eager to apply my skills to help defend critical infrastructure. Conducting a security audit,Identifying vulnerabilities for a small business.

EXPERIENCE

Freelancing :- Secyour is my own Startup to secure people from threats.

Secyour

📅 2021 2024   📍 Madhya Pradesh, India

- Conducted deep packet inspections of suspicious traffic, identifying and isolating 150 potential threats.
- Secured my 50 clients from threats such as Malware, MITM, Phisinhg, Dos, Injection Attacks.

JAVA Intern :- Worked as Java Developer

Ypsilon   May 2023 - July 2023   Madhya Pradesh, India

Appointed as a Java developer worked with java team , Learned and worked on some projects such as DBMS software and live projects, also made a flight booking website.

Marketing Intern :- Assigned as Digital marketing lead

Inspark Technologies   Nov 2022 - Dec 2022   Madhya Pradesh, India

Worked with marketing team and assigned as a marketing lead in the startup company within 1 week and enhanced the growth of the company by 15% on the social media and all.

PROJECT

News Validator :- Find fake news.

2023

- I've developed a powerful tool that ensures the accuracy and reliability of news articles. The news validator performs rigorous checks, including fact-checking, source verification, and bias analysis. By leveraging machine learning and natural language processing NLP, it identifies potential misinformation, fake news, and clickbait headlines

Look-Into:-Suspicious activity detector

📅 2024 - Present   📍

For safeguard of corporates and Childrens.

- Developing a advance software where any restricted word or unfriendly words can be detected through which a company can handle their own security if there is any chance of data breach or parents can look after their kids if they are searching any unfavorable words while surfing. **(Not a Spyware)**

FlyXpert :- Flight Booking System

Developed a flight booking system web app where any one can book their Tickets from any where to anywhere using Java .

Invoice Generator   :- Bill generating website

Build a website where any merchant or any business man can generate their bills with very simple steps.
I had made this project with the help of Java script,React,Css,HTML.

STRENGTHS

⭐ **Analytical Thinking**

Developed an improved method for anomaly detection resulting in 20% more accuracy.

🏆 **Leadership and Teamwork**

Lead a team of five in a critical infrastructure Hackathon project, completed on time. within 36 hours and Secured 6th position among 6000 Teams.

💡 **Vulnerability Assessment**

Identified over 20+ system vulnerabilities . like Malwares,Phising sites,MITM.

SKILLS

WireShark	Burp Suite	Cloud Security
Docker Search	Owasp Tools	SQL
Java Script	Python	Kali Linux
Encryption	Software Testing	
Nmap	Zap	Metasploit

CERTIFICATION

Google Cybersecurity

Completed a course from Coursera in 2024 focusing on common IT protocols.

PASSIONS

🧠 **Cybersecurity Trends**

Passionate about staying updated with latest trends in cybersecurity.

🏆 **Digital Forensics**

Intrigued by the complexities of digital forensics and enjoy learning new techniques.

EDUCATION

B.Tech in Computer Science
IPS Academy Indore
📅 2021 - Present 📍 Madhya Pradesh, India

VOLUNTEERING

Core Team Member
TEDxIPSA
📅 2023 - 2024

Being part of the core team for TEDx and organizing a TEDxIPSATalk with influential speakers from Instagram and YouTube , I learned a lot from them and being a part of team also add a huge learning experience for me that how to work with 30+ members.

- Learned to troubleshoot technical glitches, manage time constraints, and ensure event success.
- Collaborating with fellow organizers taught you effective teamwork, communication, and conflict resolution.

Managing Team Member
Google cloud Indore
📅 05/2023

- Coordinating meetups, workshops, and conferences taught you how to plan, execute, and manage technical events.
- Gained insights into networking, collaboration, and building relationships with speakers, sponsors, and attendees.
- Hosting talks on diverse technical topics exposed you to cutting-edge technologies.
- Learned from experts, explored new tools, and expanded your knowledge base.
- Balancing GDG responsibilities with other commitments honed your time management skills.
- Balancing GDG responsibilities with other commitments honed your time management skills.

Social Activist
Aashraya
📅 06/2023 - Present

Working closely with beneficiaries taught me empathy and compassion. Coordinating with team members, volunteers, and external stakeholders improved your communication skills.

- Aashraya's work likely involved fundraising or resource allocation.
- Organizing events, campaigns, or relief efforts honed your project management abilities.
- Social work often involves unpredictable situations
- You gained a holistic view of community development.
- Contributing to positive change likely brought personal fulfillment.

GDSC Core Team member
Worked as a Core Cloud Computing team member where i had handled more than 200 hundred students and help them while completing their cloud learning
